

Climate Transition Global High Yield Fund

OBJECTIVES AND PROCESS

- Seeks total return, consisting of a high level of income and capital appreciation
- Invests two-thirds of its assets in below investment-grade debt securities rated below investment grade of corporate issues domiciled anywhere in the world
- May invest no more than 10% of its net assets in unrated or lowest rated categorised debt securities
- Will hedge non-US\$-denominated investments to the US dollar
- Will target to decarbonise the sub-fund by 2050
- Uses a negative screen to exclude securities issued by companies based on their exposure to ESG risks
- May also use derivatives for hedging, efficient portfolio management or for investment purposes
- Focuses on bottom-up credit research with a focus on well-underwritten credits and relative value
- Seeks to balance income whilst aiming for a competitive yield to drive total returns

KEY RISKS

Debt securities risk: Debt securities are subject to many factors, including, but not limited to, changes in interest rates and an issuer's ability and willingness to make payments when due.

Global investment risk: Securities of certain jurisdictions may be affected by uncertainties such as international political developments, currency fluctuations and other developments in the laws and regulations of countries in which an investment may be made. These may result in rapid and extreme changes in securities prices. **High yield securities risk:** High yield securities are rated below investment grade, have a higher risk of default and prices may be more volatile than higher-rated securities of similar maturity.

Derivatives risk: The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional "cash" securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. **ESG risk:** Applying an ESG screen for security selection may result in lost opportunity in a security or industry resulting in possible underperformance relative to peers, ESG screens are dependent on third party data and errors in the data may result in the incorrect inclusion or exclusion of a security.

For regulatory reasons, we are unable to show performance until there is a complete 12 month performance record.

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this fund presents disproportionate communication on the consideration of non-financial criteria in its investment policy.

1. The fund uses the ICE BofA Developed Markets High Yield Constrained Index (USD Hedged) for performance and carbon intensity comparison. The investments of the sub-fund may deviate significantly from the components of and their respective weightings in the benchmark. The benchmark index is not consistent with the environmental or social characteristics promoted by the sub-fund.
