The key information document (KID) is accurate as at 29 January 2024.

What is the product?

Type: This product is a Société d'Investissement à Capital Variable (SICAV).

Term: The fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the fund, subject to approval by the Board of Directors.

Objectives: The fund seeks long-term capital appreciation by investing at least two-thirds of its total assets in equity securities of U.S. companies of any size, and up to 25% of its total assets in equity securities of non-U.S. issuers through ADRs, CDRs, EDRs, GDRs, IDRs and similar depository receipts as well as U.S. dollar-denominated equity securities of non-U.S. issuers. U.S. equity securities are securities issued by companies with their principal office in the United States or exercising a predominant part of their economic activities in the United States. The fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. The fund may invest in any sector, and at times it may emphasise one or more particular sectors. The fund may use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. Through the use of a negative screening process, the fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under [allspringglobal.com](https://www.allspringglobal.com). Shareholders may also request a copy from the fund or the Management Company. When selecting securities for the portfolio, the fund believes strong ESG policies and practices contribute to a company's long-term sustainability of growth, a core tenet of its investment process that focuses on companies with robust, sustainable, and underappreciated growth. The fund will invest at least 64% of the fund's assets in companies that are perceived as strong ESG performers or companies with underappreciated ESG characteristics that can drive future growth consistent with its forward-looking expectations. The fund promotes and influences a company's ESG trajectory through engagement. The fund is actively managed but uses the Russell 3000® Growth Index for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). This share class intends to distribute dividends net of expenses annually.

Intended Investor:

This product is intended for investors of all knowledge and/or experience levels who are more concerned with maximising long-term returns than minimising possible short-term losses, who have an investment horizon of 5 years or longer and who have a risk tolerance compatible with the product's SRI rating.

Depository: Brown Brothers Harriman (Luxembourg) S.C.A.

Further Information: This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d'Esch, L-1470 Luxembourg or at [allspringglobal.com](https://www.allspringglobal.com).

Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the fund's local agent in certain countries and at the registered office of the fund.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

< Lower risk Higher risk >>

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for a minimum of 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 Years

Investment: 10 000 USD

Scenarios		1 Year	5 Years
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		(recommended holding period)	
Stress scenario	What you might get back after costs	830 USD	870 USD
	Average return each year	- 91.66 %	- 38.68 %
Unfavourable scenario	What you might get back after costs	6 010 USD	7 870 USD
	Average return each year	- 39.94%	- 4.67%
Moderate scenario	What you might get back after costs	11 360 USD	18 400 USD
	Average return each year	13.64%	12.97%
Favourable scenario	What you might get back after costs	17 410 USD	31 430 USD
	Average return each year	74.13%	25.74%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances

Unfavourable: This type of scenario occurred for an investment between 11/2021 and 12/2023.

Moderate: This type of scenario occurred for an investment between 07/2014 and 06/2019.

Favourable: This type of scenario occurred for an investment between 11/2016 and 10/2021.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment: 10 000 USD	If you exit after 1 Year	If you exit after 5 Years
Total Costs	102 USD	956 USD
Annual Cost Impact	1.02 %	1.15 %

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 14.12% before costs and 12.97% after costs.
